2024

STRATEGIC RESTRUCTURING

PRESENT

STREAMLINED OPERATIONS

PRESENT DAY

2024 – Consolidated all manufacturing under Centariuss Pharma with exclusive focus on high-quality ODF products. Centaurus Lifesciences transformed into Vega Unieora Labs for R&D, marketing, and brand building.

Today we serve international markets with dedicated distribution channels. Our organization builds on 20+ years of experience and trusted industry partnerships.

www.vegaunieora.com

OUR SERVICES

We deliver integrated pharmaceutical services from research to manufacturing. With over two decades of experience, we have built a reputation for excellence and reliability.

www.vegaunieora.com

API Manufacturing

We specialize in Active Pharmaceutical Ingredient production with advanced manufacturing capabilities for domestic and international markets.

Contract Manufacturing

Our contract manufacturing services offer reliable production partnerships with scalable solutions and stringent quality controls.

Research & Development

Our dedicated R&D division develops new pharmaceutical compounds and innovative formulations from concept to commercialization.

ADVANCED THERAPEUTICS

Our specialized ODF technology sets us apart as our primary offering. We provide end-to-end solutions maintaining the highest international quality standards.

www.vegaunieora.com

Bioequivalence Studies

We facilitate BE studies and clinical research services to support regulatory submissions and ensure compliance with international standards.

Oral Disintegrating Films

ODF technology represents our core expertise in prescription medications that dissolve instantly, providing enhanced patient compliance.

Wellness & Nutraceuticals

We manufacture wellness products and nutraceutical formulations with innovative delivery systems for superior bioavailability.

ORAL DISINTIGRAING FILMS

Instant-dissolving oral strips that melt on your tongue in seconds—no water needed. Fast, precise, and flavorful with superior bioavailability. WHO-GMP certified innovation redefining medicine, one strip at a time

SWIFT CLOT

Stops bleeding, swiftly

Chitosan **Haemostatic** Dressing

For temporary use to **STOP BLEEDING**
Apply with pressure. Remove with water/saline

STERILE R

5 x 5 cm

Qty: 1 unit

SWIFT CLOT
Stops bleeding, swiftly

DESCRIPTION: Swift clot chitosan haemostatic dressing is a non-absorbable, single-use haemostatic dressing that is sterile and designed to control moderate to severe bleeding. Additionally, Swift Clot serves as a bacterial barrier. Through blood clotting, cell regeneration stimulation, and anti-microbial activity, Swift Clot also reduces inflammation and speeds up wound healing.

HOW TO USE?

1 Open the pack and remove Swift Clot from it.

2 Place it on the bleeding wound and apply uniform pressure until Swift Clot sticks onto it.

3 To remove, irrigate Swift Clot with plenty of water or saline and gently peel it off.

CAUTION / WARNING: Non absorbable dressing. Do not implant. Do not reuse. Do not re-sterilise. Do not use if pack is damaged or open. Contains chitosan from shrimp shells. Keep the Swift Clot in place for at least 10 minutes even after the bleeding has been controlled. Swift Clot is intended for temporary bleeding control only.

STORAGE: Store at room temperature. Avoid heat, moisture, and direct sunlight.

WIFT CLOT

When Every Second Counts

Swift Clot is an advanced chitosan haemostatic dressing engineered to stop bleeding quickly and effectively. Designed for emergency situations, it helps achieve rapid clot formation while protecting the wound and supporting faster recovery.

Why Choose Swift Clot?

- ✓ Fast-acting bleeding control
- ✓ Reliable haemostatic performance
- ✓ Antimicrobial barrier protection
- ✓ Supports natural tissue regeneration
- ✓ Easy application and removal
- ✓ Sterile, single-use dressing

Fast Action. Reliable Protection. Better Outcomes.
